

January 13, 2021

To Residents and Family Members:

New Positive COVID-19 Residents & Employees since January 11<sup>th</sup> –

January 12, 2021 –

1 Resident from Harborview tested positive for COVID-19

1 Resident from Tidewater Cove tested positive for COVID-19

1 Employee tested positive for COVID-19

The CDC reports, in clinical trials, that the Pfizer vaccine that our residents & staff received was 95% effective after 2 doses, but it takes time for the body to build protection after each dose. The Vaccine could start to provide protection against COVID-19 within 10 days after the first shot but may not provide protection until a week or two after the second shot.

We are reminding staff to follow all infection control guidelines at home and at work. The health of our residents & staff is dependent on being compliant at all times.

Thank you.

Sincerely,

Peter A. Panos

Administrator
