

March 1, 2022

To Residents and Family Members:

COVID Update at Citizens Care –

Monday evening (February 28th), a resident on the Riverwalk isolation unit became symptomatic and was tested for COVID-19, the results were positive. It has only been 19 days since our most recent Outbreak ended, that being said, this positive test will be considered a continuation of the prior Outbreak that started on December 20, 2021.

As a precaution, all residents residing on Riverwalk were tested Monday evening and all were negative with the exception of the 1 positive resident. This positive test result will be considered an isolated outbreak.

All employees were routinely tested Monday, February 28 and all were negative. The frequency of employee testing will remain at weekly.

The COVID positivity rate in Harford County is 3.6%, down from 4.4% last week. The level of community transmission in Harford County remains unchanged at SUBSTANTIAL.

As always, please contact me directly if you have any questions or concerns. I can be reached at 410-942-2101. If I'm unavailable when you call, please leave a message and I will call you back as soon as possible.

Sincerely,

Peter A. Panos

Administrator
